Century II Insulated Tray System

Servers and covers that work together to help you deliver better meals
Aladdin’s uniquely designed meal-delivery systems use the thermal zone principle (temperature retention within the individual serving compartments) to maintain hot and cold temperatures.

Once the meals leave the kitchen, no additional energy is required. Systems are available in a variety of configurations to accommodate any menu, with space for utensils and beverages.

Walled compartments and covers reduce spillage and stabilize dishes during transport, especially when delivering to satellite locations.

A variety of reusable and disposable dishes are available to meet specific serving requirements. Available in multiple colors, the lightweight, compact design of our insulated trays enables delivery on flatbed or denested carts, which are also available from Aladdin!

The Century II Designer Series has a 9” (22.9 cm) round entrée dish compartment for traditional service and larger serving portions.

Its large, multi-use insulated side compartment can accommodate multiple dishes to maximize serving flexibility. A full cover provides optimal sanitation, and reduces spillage and potential food theft. It also has the lowest server/cover profile among round dish insulated trays.

Use with china, reusable plastic dishes and/or disposables—all available from Aladdin!
